

Project Demo Planning

Date:

15 March 2026

Team ID:

SWTID-2026-7578

Project Name:

Implement Client Script & UI Policy (Incident)

Maximum Marks:

1 Mark

PROJECT DEMO PLANNING

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                  | Description                                                                                                                 | Duration | Responsible Member |
|------|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------|----------|--------------------|
| 1    | Introduction & Context        | Project objective, ServiceNow Incident Form customization scope, and business problem statement.                            | 2 mins   | Team Lead          |
| 2    | UI Policy Showcase            | Demonstrate dynamic mandatory fields (Assignment Group / Assigned To) and Read-Only Urgency rules on High Impact incidents. | 3 mins   | Developer 1        |
| 3    | Client Script Showcase        | Live execution of onChange (auto-set urgency), onSubmit (validation), and onCellEdit (list restriction).                    | 4 mins   | Developer 2        |
| 4    | Edge Case & Reverse Logic     | Demonstrate how rules revert gracefully when Impact changes back and how submission blocks invalid entries.                 | 2 mins   | QA Lead            |
| 5    | Summary & Architecture Review | Brief wrap-up on best practices, execution sequence, and maintainability of the implemented solution.                       | 2 mins   | Team Lead          |
| 6    | Q&A Session                   | Open floor to address questions from evaluators and stakeholders regarding configuration choices.                           | 2 mins   | All Team Members   |

DEMO FLOW SUMMARY

| Step | Activity                         | Notes                                                                                                                |
|------|----------------------------------|----------------------------------------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Set the context regarding Incident Management data consistency challenges and required automation.                   |
| 2    | Solution Overview                | Briefly explain the separation of concerns between UI Policies (no-code rules) and Client Scripts (custom JS logic). |

| Step | Activity                   | Notes                                                                                                                 |
|------|----------------------------|-----------------------------------------------------------------------------------------------------------------------|
| 3    | Live Feature Demonstration | Perform live form edits on ServiceNow PDI to demonstrate real-time client-side behavior and error handling.           |
| 4    | Q&A Session                | Address technical queries from judges regarding script optimization, client vs server execution, and UI policy order. |
