

Brainstorming & Idea Prioritization Template

Date: October 3, 2026

Team ID: SWTID-2026-7578

Project Name: Implement Client Script & UI Policy (Incident)

Maximum Marks: 3 Marks

STEP 1: BRAINSTORM AND IDEA LISTING

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Dev Team	Enforce mandatory Assignment Group when Impact is set to 1 - High using a UI Policy.	UI Policy	1
2	Dev Team	Make the Urgency field read-only automatically whenever the Incident impact is High.	UI Policy Action	1
3	Dev Team	Auto-set Urgency to High and display an informational pop-up message when Impact becomes High.	onChange Client Script	2
4	QA Team	Prevent saving Incident records if Assigned To field is empty on High impact incidents.	onSubmit Client Script	2
5	Admin Team	Block direct modifications to the Incident State field from the list view edit mode.	onCellEdit Client Script	3
6	QA Team	Verify reverse condition behavior: revert fields when Impact is changed back to Medium.	Testing & Validation	3

STEP 2: IDEA PRIORITIZATION

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	High Impact UI Policy & Read-Only Urgency Action Enforce Assignment Group mandatory & set Urgency read-only for High impact.	High	High	P1	Yes
2	Dynamic Form Scripts (onChange & onSubmit) Auto-set urgency on change & block submission if Assigned To is missing on High impact.	High	High	P1	Yes
3	List Editing Controls & Reverse Validation Block list-based State modifications using onCellEdit and test reverse rules.	High	Medium	P2	Yes

SELECTED IMPLEMENTATION CODE CONSTRUCTS

1. onChange Script (Auto set Urgency):

```
function onChange(control, oldValue, newValue, isLoading) {
  if (isLoading || newValue == '') return;
  if (newValue == '1') {
```

```
        g_form.setValue('urgency', '1');
        g_form.addInfoMessage('Urgency set to High for High impact incident.');
```

```
    }
}
```

2. onSubmit Script (Assigned To Validation):

```
function onSubmit() {
    if (g_form.getValue('impact') == '1' && g_form.getValue('assigned_to') == '') {
        g_form.showErrorMessage('Assigned To is mandatory for High impact incidents.');
```

```
        return false;
    }
    return true;
}
```

3. onCellEdit Script (List Edit Restriction):

```
function onCellEdit(sysIDs, table, oldValues, newValue, callback) {
    alert('State cannot be updated using list editing. Please open the Incident.');
```

```
    callback(false);
}
```
