

Project Initialization and Planning Phase

Date: October 3, 2026	Team ID: SWTID-2026-7578
Project Name: Implement Client Script & UI Policy (Incident)	Maximum Marks: 3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

CUSTOMER PROBLEM STATEMENT TABLE

PS #	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A male applicant seeking a loan.	Secure a loan for the property.	Married with no co-applicant income.	Self-employed with a good credit history.	Optimistic about loan approval
PS-2	An IT Service Desk Agent logging critical production incidents.	Ensure high-impact incidents are assigned to the correct technical team with accurate urgency ratings.	Incomplete or inconsistent data gets submitted, missing mandatory assignment groups and urgency details.	Relying on manual checks without dynamic UI Policy controls or auto-setting scripts.	Frustrated
PS-3	An Incident Manager governing platform data quality & SLA compliance.	Maintain accurate reporting and prevent unauthorized state changes across records.	Users submit forms without mandatory fields or bypass workflow rules by editing states in list views.	Client-side save validations (onSubmit) and list-editing blocks (onCellEdit) are not active.	Anxious

PROJECT TECHNICAL IMPLEMENTATION SUMMARY

1. High Impact UI Policy & Read-Only Action:

- Table: Incident | Condition: Impact == '1' (High)
- Actions: Set Assignment group mandatory, set Urgency read-only, Reverse if false = true.

2. onChange Client Script (Auto-set Urgency):

```
function onChange(control, oldValue, newValue, isLoading) {
  if (isLoading || newValue == '') return;
  if (newValue == '1') {
    g_form.setValue('urgency', '1');
    g_form.addInfoMessage('Urgency set to High for High impact incident.');
```

3. onSubmit Client Script (Mandatory Assigned To Validation):

```
function onSubmit() {
  if (g_form.getValue('impact') == '1' && g_form.getValue('assigned_to') == '') {
    g_form.showErrorMessage('assigned_to', 'Assigned To is mandatory for High impact incidents.');
```

```
        return false;
    }
    return true;
}
```

4. onCellEdit Client Script (List Edit Restriction):

```
function onCellEdit(sysIDs, table, oldValues, newValue, callback) {
    alert('State cannot be updated using list editing. Please open the Incident.');
```

```
    callback(false);
}
```
