

Solution Architecture Template

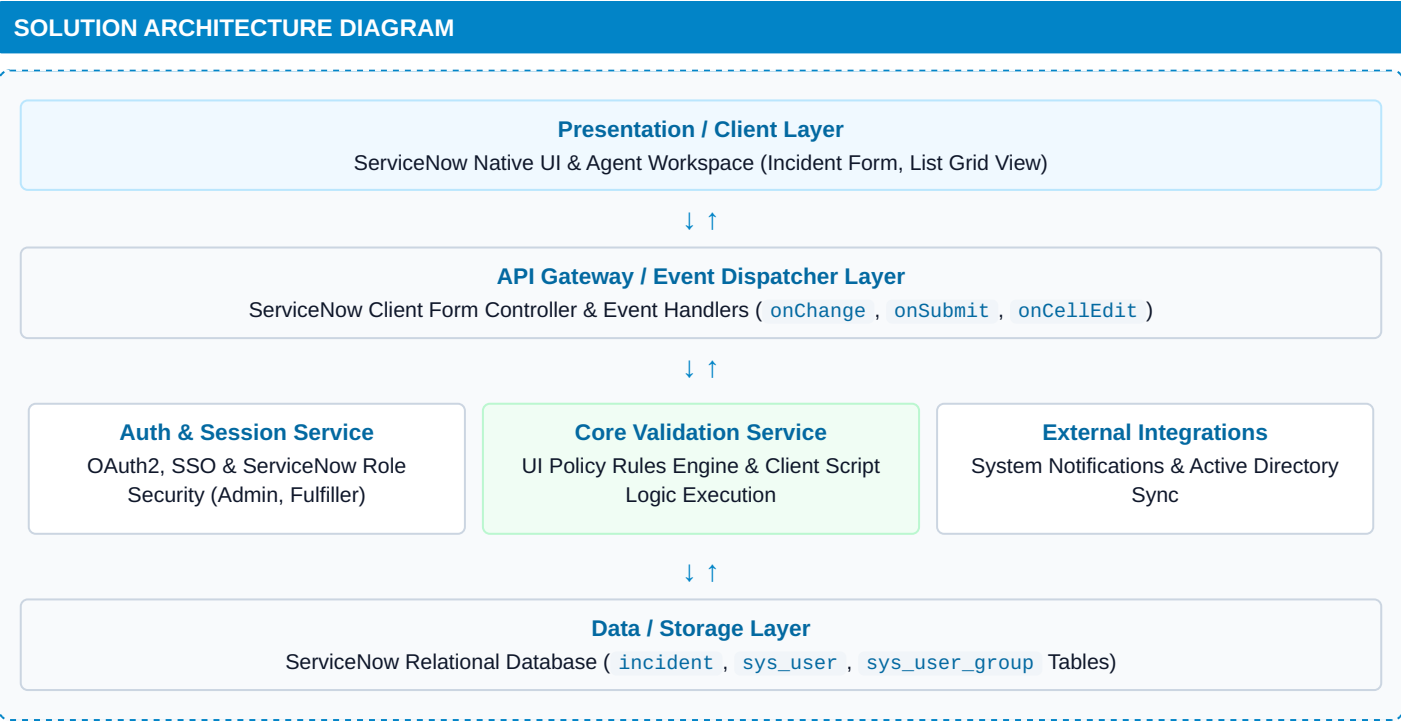

Date: October 3, 2026

Team ID: SWTID-2026-7578

Project Name: Implement Client Script & UI Policy (Incident)

Maximum Marks: 5 Marks

Solution Architecture Diagram:
Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer.

Component Description Table		
Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Renders dynamic incident forms and workspace lists; intercepts user interactions and displays real-time <code>g_form</code> validation messages and info callouts.	ServiceNow Form Engine, HTML5/CSS, JS ES6
API Gateway / Event Dispatcher	Intercepts client events (field change, form submit, list cell edit) and dispatches them to appropriate script listeners for validation processing.	ServiceNow Client API, Event Dispatcher
Microservices / Logic Services	Executes UI Policy condition checks (mandatory/read-only states) and evaluates custom JavaScript logic (e.g., auto-setting urgency, checking assignment).	GlideForm (<code>g_form</code> API), Client Scripts, UI Policy Engine
Database Layer	Stores structured ticket metadata, user identities, assignment group mappings, and audit logs with transactional consistency.	ServiceNow MariaDB Storage Engine
